

CORVETTE

Overseas Model Shown

INTRODUCTION

A SPORTS

CAR DYNASTY

CONTINUES.

The eighth-generation Corvette, continues to impress the most seasoned automobile enthusiasts around the world.

For the first time ever, GMSV is thrilled to be bringing the Corvette in factory right hand drive to Australia and New Zealand.

Available in coupe or convertible, the Corvette is everything mid-engine advocate and Corvette patron saint Zora Arkus-Duntov could have imagined.

The Stingray is a Corvette for a new age and will no doubt entice future generations of Corvette enthusiasts who seek a driving experience like no other.

3LT COUPE WITH Z51 PERFORMANCE PACKAGE AND OPTIONS | TORCH RED

This brochure may include images of overseas models of the C8 Corvette. The models available at your local dealership may have specifications which have been localised for use in Australia and New Zealand. Information on local model specifications is available at your local GMSV dealership. To locate your nearest GMSV dealer, please visit <https://www.gmspecialtyvehicles.com/locate-dealer>.

BENEFITS OF MID-ENGINE

—
BEAUTY
UNDER
GLASS.

3LT COUPE WITH Z51 PERFORMANCE PACKAGE AND OPTIONS | TORCH RED

Overseas Model Shown

Your first impression is that beautiful engine behind the cockpit, visible on coupe models. Why is it located there? First, this puts the weight of the engine over the rear-driving wheels to enhance traction. With the engine behind the cockpit, there's more forward visibility. And with the seats positioned closer to the front wheels, the driver and passenger are at the car's centre of gravity.

The result is the kind of reflexes you'd expect from a well-honed sports car. Stingray proves that life is indeed a beautiful ride.

DESIGN

SWEEPING PROPORTIONS

WITH A BOLD, WIDE STANCE.

Mid-engine architecture dictated a different shape for the eighth-generation Corvette. Designers made a polite nod to its proud heritage. Function played a huge role, with large front intakes and sculpted side intakes that help the engine breathe and stay cool. With the cockpit moved significantly forward, the side profile reveals a short hood with a long, graceful rear deck. The rear fascia features two functional air exits flanked by twin taillamps and twin exhaust outlets on each side, leaving no doubt about what you're driving.

DESIGN

The eighth-generation Corvette cockpit is well-suited to enthusiast driving. Your driving position is some 40 centimetres forward compared to the previous generation. The low forward cowl makes it easy to see, while a racing-style steering wheel with paddle shifters keeps the view pure and also provides extra knee room. Your rear sight lines are equally as impressive, thanks

to the Rear Camera Mirror.¹ Console controls include a push-button toggle switch gear selector and a leather-wrapped Driver Mode Selector. Finally, a flowing buttress is topped with easy-to-reach climate controls.

¹Read the vehicle Owner's Manual for important feature limitations and information.

THE COUPE.

THE CONVERTIBLE.

3LT COUPE WITH OPTIONS | CERAMIC MATRIX GREY METALLIC

3LT COUPE WITH Z51 PERFORMANCE PACKAGE AND OPTIONS | RAPID BLUE (EXTRA COST)

3LT CONVERTIBLE WITH Z51 PERFORMANCE PACKAGE AND OPTIONS | SILVER FLARE METALLIC

The Stingray coupe features a lightweight, easily removable roof panel that stows conveniently in the rear trunk. Choose from a standard body-colour roof panel or available transparent or carbon-fibre versions. The coupe also has a clear glass cover to display the engine.

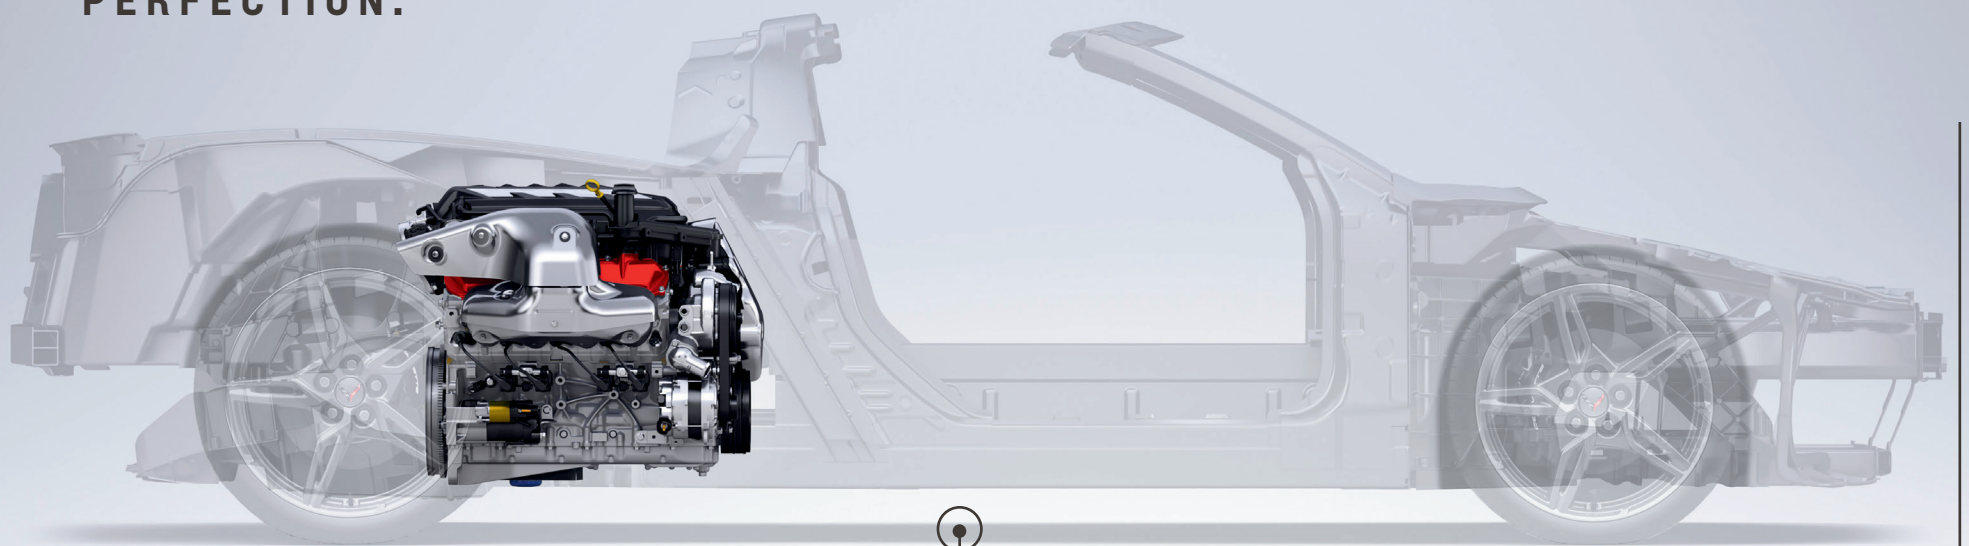

The Stingray convertible features a production retractable hardtop that automatically folds neatly over the engine compartment in 16 seconds and can be operated at speeds up to 48 km/h.

The convertible hardtop retains the coupe's aerodynamic form and produces a similar drag coefficient with the top up. In the lowered position, the top does not intrude on trunk space. Track enthusiasts will be pleased to know that the newest convertible with the top up meets the same standards as the coupe.

ARCHITECTURE

—

**A 40/60 WEIGHT
DISTRIBUTION,
FOR PERFORMANCE
PERFECTION.**

40/60 FRONT-TO-REAR
WEIGHT DISTRIBUTION

For most of automotive history, engineers have sought a 50/50 weight distribution, especially for front-engine cars with rear-driving wheels. But Zora Arkus-Duntov declared a 40/60 front-to-rear weight ratio as ideal when he was developing the first Chevrolet mid-engine concept car – CERV I (Chevrolet Experimental Research Vehicle).

The newest generation of Stingray uses the same 40/60 front-to-rear weight ratio. Equally important, however, is the extraordinary rigidity of the structure itself, thanks to its architecture and materials.

The secret is a closed centre tunnel backbone conjoined by twin rails top and bottom. Many of the aluminum pieces are made with high-pressure die castings for extraordinary density. Others are made out of cast, forged or extruded aluminum. There is even a carbon-fibre rear bumper beam.

This rigid structure not only allows Stingray to change direction in heroic ways, but also quickens acceleration times.

3LT COUPE WITH Z51 PERFORMANCE PACKAGE AND OPTIONS | TORCH RED

COILED AND READY TO DEVOUR ANY CORNER.

Quick reflexes were mandatory. The eighth-generation Corvette features a modified SLA (short/long arm) suspension geometry as well as coil springs on all four corners of the car. This configuration keeps spring rates and damping low for comfort while enabling track high-g cornering capability.

The Magnetic Selective Ride Control™ system integrates with the Driver Mode Selector to adjust ride stiffness in real time using magnetised ferrous particles in the shock fluid.

The Z51 Performance Package includes Michelin® Pilot® Sport 4S tyres which offer excellent lateral grip on track performance.

ENGINE

— HEART AND SOUL.

Powering Stingray is a 6.2L LT2 aluminum small block V8 engine. Now in fifth-generation form, it is more compact yet more powerful: 369 kilowatts of power and 637 Nm of torque. Much of the LT2's additional power can be attributed to excellent breathing. The intake system is a low-restriction design and incorporates identical 210 mm runners and an 87 mm throttle body. The performance header exhaust manifolds are also low-restriction and feature a stylised four-into-one design.

A standard dry-sump oil system is integrated into the block and allows the engine to be positioned for a lower centre of gravity. Three scavenging pumps capture circulating oil to ensure pressurised distribution even in the highest-g situations on the track.

Overseas Model Shown

IT'S ALL ABOUT THE SEAMLESS ADMINISTRATION OF POWER.

The Corvette is equipped with advanced powertrain technologies that let you get the most out of almost any driving situation. One of those is the standard Driver Mode Selector. It allows the driver to select preferences when it comes to shift points, steering effort, engine sound and braking feel. Bad weather or freezing conditions can also affect choices. Six driving modes are available, including four standard presets – Tour, Weather, Sport

and Track – plus two flexible modes.

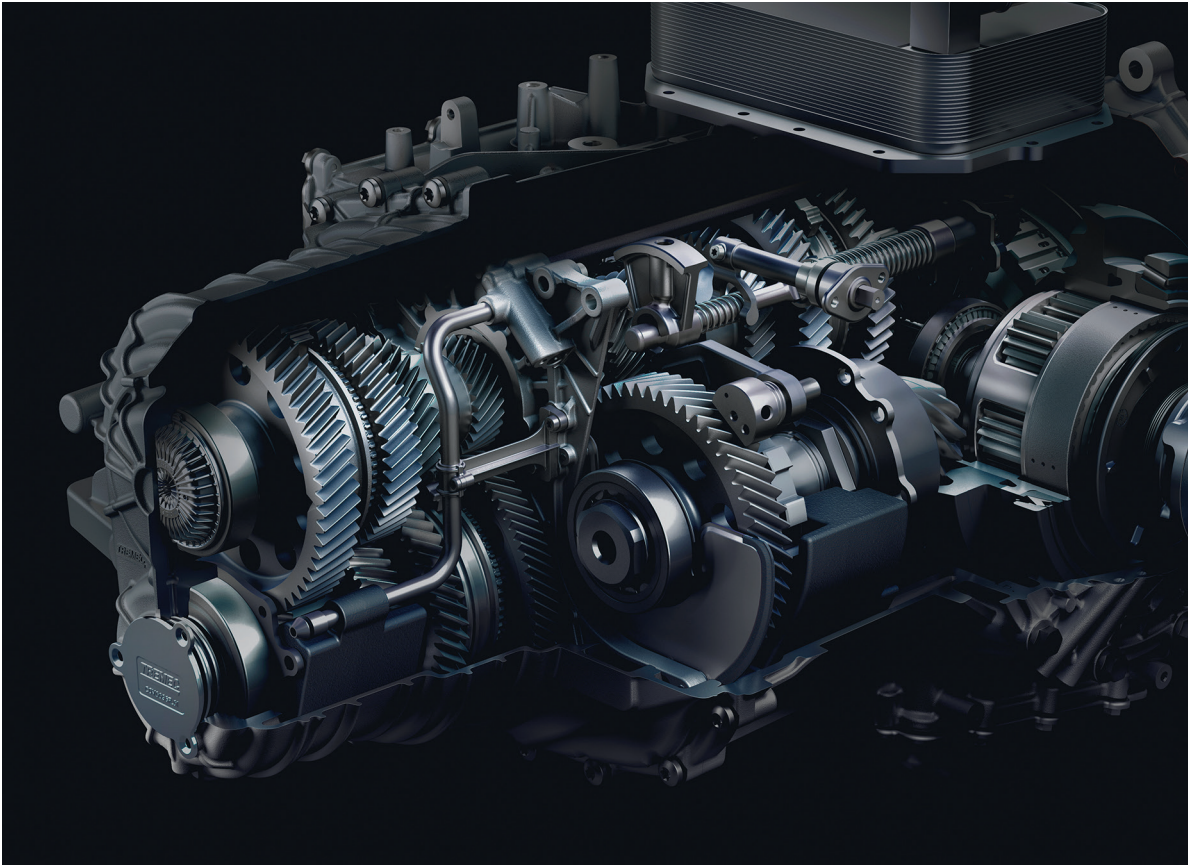

These include My Mode, which allows you to create your own combination of presets for everyday use, and Z Mode, which lets you choose from a larger menu of high-performance settings for the engine, transmission and steering, especially for a particular road or track – all by pressing the silver Z button on the steering wheel.

The control of a manual. The smoothness of an automatic. And it shifts faster than any human can, helping create the fastest-accelerating production Stingray ever. The 8-speed dual-clutch transmission is effectively two manual gearboxes that have clutches actuated by computers on a concentric shaft so there is no torque loss.

There's a shaft for even gears 2-4-6-8-R and another for odd gears 1-3-5-7. The shifting schedule aligns to your chosen Driver Mode Selector position. As you shift via the paddles, you can simultaneously engage one shaft while you're disengaging another, giving you the ultimate feeling of control.

THE PINNACLE OF PERFORMANCE.

The architecture, structure, suspension, calibrations and software of Stingray are all ready to deliver a driving experience beyond your imagination. The Z51 Performance Package provides a group of performance enhancements, including:

- Performance brakes with larger brake rotors and performance brake pads
- Performance suspension (FE4)
- Performance exhaust
- Performance final drive ratio
- Electronic Limited-Slip Differential
- Rear spoiler and front splitter
- Heavy-duty cooling system

CHOOSE THE INFORMATION THAT SUITS YOUR SITUATION.

Corvette engineers recognise that you have different information needs in different driving situations. A 12-inch diagonal customisable gauge cluster dominates the controls with graphics that change completely depending on your selected driving mode. You can view the wide cluster display neatly framed by the racing-style steering wheel. The display itself has two panels on the left side of the tachometer and four panels with track display that you can populate with specific information or gauges using the Options menu. An 8-inch diagonal colour touch-screen is conveniently positioned just to the left of the central cluster.

A button and pull toggle gear selector helps simplify the console area. The Driver Mode Selector features a leather-accented palm rest, while climate controls are located atop the buttress separating driver and passenger.

BOSE PERFORMANCE SERIES 14-SPEAKER SYSTEM

—

TECHNOLOGY

UNTETHERED.

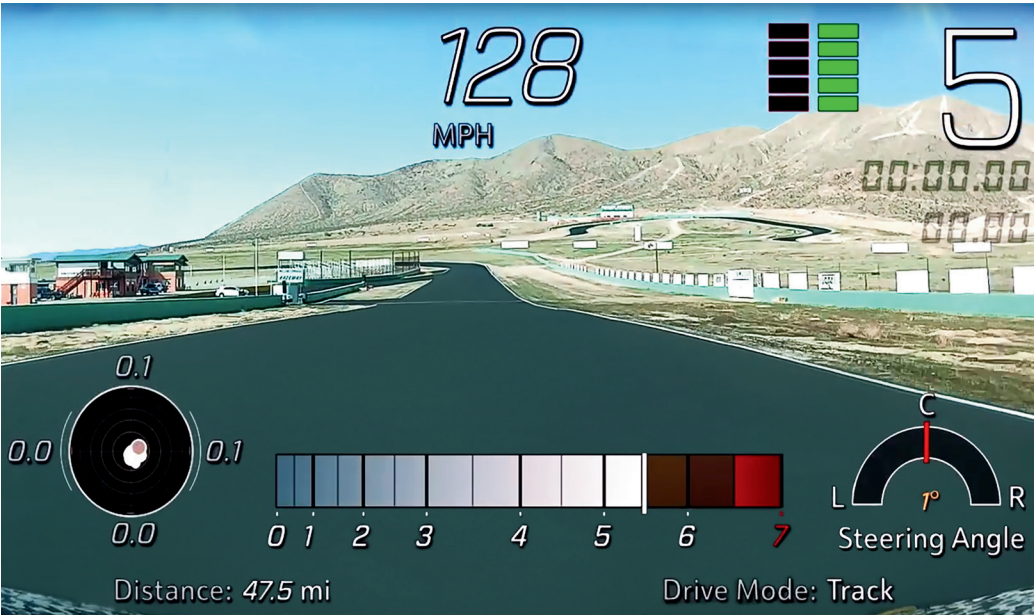

High performance takes on many dimensions in the Stingray. Among them is a 14-speaker Bose Performance Series, the most powerful sound system ever in a Stingray. Stay connected, with wireless Apple CarPlay^{®1} and wireless Android Auto^{™2} compatibility.

Help yourself become a better driver with the Performance Data Recorder. When activated, it logs video of your drive onto an SD memory card. Three modes allow you to capture video, audio, driving stats, date and time, and much more. A fourth, Valet Mode, can record the activity of your car when you're not around.

A Head-Up Display (HUD) system offers three distinct views for Tour, Sport and Track modes. Tour mode includes speed limit and turn-by-turn navigation prompts. Sport mode includes digital speed, tachometer and a g-force indicator. Track mode includes digital speed, tachometer, shift lights, best lap time, current lap time and gain/loss.

WIRELESS CHARGING³

PERFORMANCE DATA RECORDER

¹ Vehicle user interface is a product of Apple and its terms and privacy statements apply. Requires compatible iPhone and data plan rates apply. ² Vehicle user interface is a product of Google and its terms and privacy statements apply. Requires the Android Auto app on Google Play and a compatible Android smartphone. Data plan rates apply. ³ SD memory card is not included with the Performance Data Recorder ⁴ The system wirelessly charges one compatible mobile device. Some phones have built-in wireless charging technology and others require a special adaptor/back cover.

SEATING

COMPETITION SPORT | EXTRA
SUPPORT FOR TRACK DRIVING

GT1 | OPTIMIZED FOR
COMFORT AND SUPPORT

GT2 | NAPA LEATHER AND
CARBON-FIBRE INSERTS

THREE WAYS TO BECOME ONE WITH YOUR CORVETTE.

Becoming one with a car means you're properly situated behind the controls. Corvette offers three different seats for different driver preferences, all in a multitude of colour combinations and contrasting colour seat belts.

The GT1 seat in Mulan leather provides an intelligent balance between excellent support for enthusiastic driving and easy entry/egress for regular driving use.

The GT2 seat in Napa leather blends the comfort of the GT1 seat with the appearance and carbon-fibre trim of the Competition Sport seat. Sueded microfibre or two-tone leather inserts are available.

The Competition Sport seat provides aggressive bolsters for track driving, with a performance textile in high-wear areas.

CARGO SPACE

FRONT TRUNK

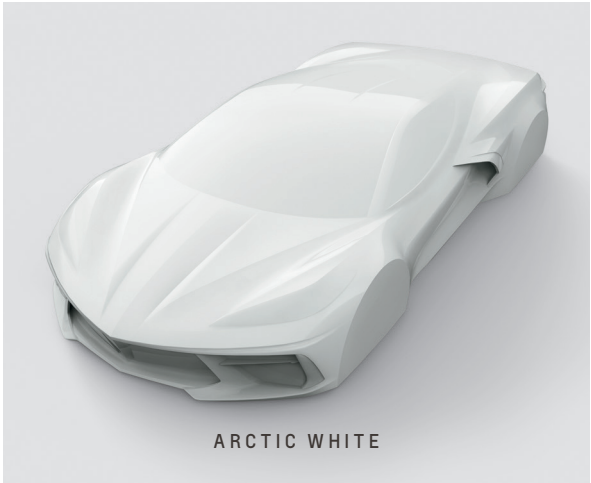

REAR TRUNK

Stingray is equipped with two trunks, one in the front and one in the rear behind the engine, for luggage, coolers, groceries and more. Both coupe and convertible offer the same 356.8 litres of cargo area¹! The front trunk will accommodate a standard carry-on roller bag as well as a medium backpack. The rear trunk will carry up to two sets of golf clubs or the removable roof panel (coupe). This kind of versatility makes Stingray a real-world grand touring machine.

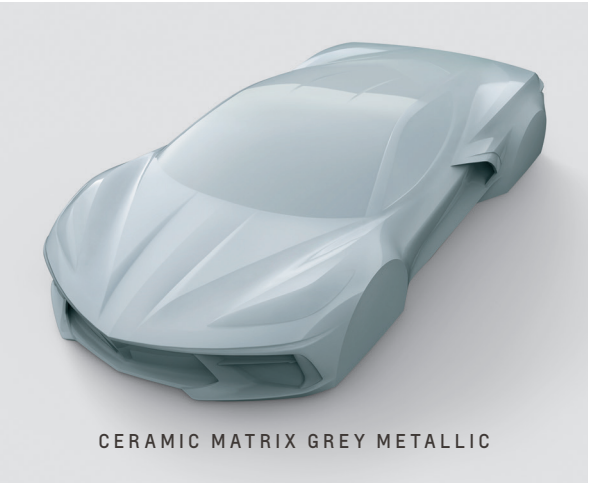

¹ Cargo and load capacity limited by weight and distribution.

3LT COUPE WITH Z51 PERFORMANCE PACKAGE AND OPTIONS | RED MIST METALLIC TINTCOAT (EXTRA COST)

STANDARD FEATURES

2LT COUPE AND CONVERTIBLE Include these features:
MECHANICAL
Active handling stability control
Brakes – 4-wheel antilock and painted Brembo® 4-piston calipers
Differential – electronic limited-slip
Driver Mode Selector – six modes: Tour, Sport, Track, Weather, and My Mode and Z Mode customisable modes
Engine – 6.2L LT2 V8 with Variable Valve Timing and Active Fuel Management™
Exhaust – aluminised stainless steel with stainless steel tips
Frame – aluminum structure
Steering – speed-sensitive magnetic power steering with variable ratio
Suspension – 4-wheel independent
Transmission – 8-speed dual-clutch with manual and automatic modes
EXTERIOR
Accents – Carbon Flash Metallic-painted side vents and front/rear grille accents; tonneau grille on Convertible
Antenna – integral front and rear
Badges – Carbon Flash Metallic-painted or Chrome
Convertible top – retractable, power-folding hardtop painted body-colour; remote power-down; glass rear window, power with integral defogger
Daytime running lamps – LED
Glass – Solar-Ray® light-tinted
Headlamps – LED projector-style
Mirrors – heated, power-adjustable, power-folding, driver-side auto-dimming with turn signal indicators
Rear Park Assist¹
Rear Cross Traffic Alert¹
Roof panel – body-colour, removable (coupe)
Side Blind Zone Alert¹
Tyres – 245/35ZR19 front and 305/30ZR20 rear, blackwall, performance, Michelin Pilot Sport 4S tyres
Wheels – 19" x 8.5" front and 20" x 11" rear 5-open-spoke Bright Silver-painted aluminum
Wipers – front, intermittent
INTERIOR
Air conditioning – dual-zone automatic climate control with individual climate settings for driver and passenger; air filtration system with pollen filter; outside temperature display
Audio – Bose Performance Series 14-speaker system
Camera display – HD Rear Vision Camera¹ and HD front cameras¹ (curb view)
Cargo nets – two
Connectivity – NFC Bluetooth® device pairing for easy “one-touch pairing” of Bluetooth device²
Cruise control – electronic with Set and Resume Speed
Defogger – rear-window, electric
Door locks – power programmable with lockout protection
Entertainment – Chevrolet Infotainment 3 Plus system³ with 8-inch diagonal HD colour touch-screen, AM/FM stereo, Bluetooth audio streaming² for two active devices, wireless Apple CarPlay®⁴ and wireless Android Auto™⁵ compatibility.
Floor console – two covered cup holders, two auxiliary power outlets, two USB ports⁸; auxiliary input jack and lockable storage
Floor mats – carpeted
Gauge cluster – 12-inch diagonal colour driver information display with multiple selectable modes and gauge configurations
Hatch (coupe) or trunk (convertible) release – push-button open, hidden, power pull-down
Head-Up Display (HUD) - colour, with readouts for Tour, Sport and Track modes, vehicle speed, gear, engine rpm, shift lights, turn signals, high beam headlamps, turn-by-turn navigation, g-meter, speed limit and lap times

Keyless Open and Start – two remote transmitters
Lighting – theater dimming
Memory Driver and Passenger Convenience Package – memory settings for steering wheel, outside mirrors, and driver and passenger seats; activated by key fob or door button
Performance Data Recorder
Rear Camera Mirror¹ – rearview auto-dimming with full camera display
Remote vehicle starter system
Seat belts – Black
Seats – GT1 buckets with 8-way power adjusters, heated and ventilated; power bolster and power lumbar
Steering column – power tilt and telescopic
Steering wheel – leather-wrapped, heated, with mounted audio, voice, cruise, phone and gauge cluster controls
Theft-deterrent system – electrical, unauthorised entry, vehicle inclination sensor, vehicle interior movement sensor; activates horn, vehicle inclination engine immobilizer and audible/visual alarm
Vehicle health management – provides advanced warning of vehicle issues
Visors – covered illuminated vanity mirrors
Windows – power with driver and passenger express-up/-down
Wireless Charging⁶

3LT COUPE AND CONVERTIBLE In addition to or replacing 2LT features, 3LT includes:
INTERIOR
Custom Leather-Wrapped Interior Package – leather-wrapped upper instrument panel, door trim panels and console
Seats – GT2 bucket seats with 8-way power adjusters, power bolster and power lumbar
Sueded Microfibre-Wrapped Interior Package – headliner, visor, trim above windshield and rear window, and A-pillar trim in colour-keyed sueded microfibre

WARRANTY

Our voluntary warranty is 3-years or 100,000km's (whichever occurs first), and it also comes with guarantees under the Australian Consumer Law that cannot be excluded. In addition to our warranty, you may also have rights under the Consumer Guarantees Act in New Zealand which cannot be excluded. The car also comes with 3-years Roadside Ultra Assistance.

IMPORTANT INFORMATION

A word about this brochure. Images shown are for illustration purposes only. This brochure was developed to showcase the C8 Corvette, however some overseas variants have been depicted. We have tried to make this brochure as comprehensive and factual as possible, however, since the time of publication (March 2022) some of the information you'll find here may have been updated. Also, some of the equipment shown or described throughout this brochure may have been changed and/or is available at extra cost. Further, General Motors Australia & New Zealand Pty Ltd ABN. 84 006 893 232 (GMSV) reserves the right to make changes at any time, without notice, in prices, colours, materials, equipment and models. Your GMSV Dealer has details and, before ordering, you should ask them to bring you up to date. No GMSV Dealer, or other person, is authorised, or permitted, to give, or make any statement, assertion or undertaking in relation to the quality, performance characteristics, descriptions or fitness for any purpose, of GMSV product which is at variance with any written statement, assertion or undertaking on any of these subjects given, or made, by GMSV in its published sales literature, and GMSV does not accept any liability for such unauthorised action. GMSV has authorised Dealers in many parts of Australia and New Zealand for the sale of service parts and the provision of service to owners of GMSV's products. Every endeavour is made to ensure that such Dealers carry adequate stocks of service parts but GMSV makes no promise other than that contained in the New Vehicle Warranty given by GMSV, that such parts or service facilities will be available at any specific location, or at any particular time. Details are also available from GMSV on request. Copyright General Motors Australia & New Zealand Pty Ltd. (GM Specialty Vehicles) ABN. 84 006 893 232. Colours are for illustration purposes only.

Engines. Chevrolet products are equipped with engines produced by GM Global Propulsion Systems or other suppliers to GM worldwide. The engines in Chevrolet products may also be used in other GM makes and models.

Assembly. Chevrolet vehicles and their components are assembled or produced by different operating units of General Motors, its subsidiaries or suppliers to GM worldwide. We sometimes find it necessary to produce Chevrolet vehicles with different or differently sourced components than

originally scheduled. Since some options may be unavailable when your vehicle is assembled, we suggest you verify that your vehicle includes the equipment you ordered and that, if there were changes, they are acceptable to you.

A note on child safety. Always use seat belts and the correct child restraint for your child's age and size, even with airbags. Never place a rear-facing infant restraint in the front seat of any vehicle equipped with an active frontal airbag. See your vehicle Owner's Manual and the child safety seat instructions for more safety information.

Tyres. Corvette is equipped with run-flat Michelin® Pilot® tyres that eliminate the need for a spare. The tyre design enables safe function during and after loss of pressure for some distance at a moderate speed. The shorter the distance that you drive with loss of pressure, the better the chance that the tyre can be repaired. As soon as possible, contact Roadside Assistance for the nearest authorised GMSV or run-flat tyre servicing facility and have the tyre inspected. See your Owner's Manual. Corvette has low-profile tyres that tend to wear faster and are more susceptible to damage from road hazards or curb impact than standard profile tires. This type of damage is not covered by the GM New Vehicle Limited Warranty.

Safety. GMSV is committed to helping keep you safe – from the start of your journey to your destination. That's why GMSV vehicles offer standard and available safety and security features to help give you peace of mind.
